Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims:

- 1-39 (Canceled).
- 40. (New) A light emitting device comprising:

an electroluminescent element using a luminescent material in which electroluminescence is obtained by triplet excitation; and

a semiconductor component electrically connected to the electroluminescent element, wherein the light emitting device is operated by signals having a voltage selected from two voltages.

- 41. (New) A device according to claim 40, wherein the semiconductor component is a TFT.
- 42. (New) An electrical appliance using the light emitting device according to claim 40.
- 43. (New) A portable telephone using the light emitting device according to claim 40.
- 44. (New) A digital camera using the light emitting device according to claim 40.
- 45. (New) An audio equipment using the light emitting device according to claim 40.
- 46. (New) A wireless portable equipment using the light emitting device according to claim 40.

47. (New) A light emitting device comprising:

wherein Et represents etyl group; and M represents an element belonging to group 8 to 10 of a periodic table, and

wherein the light emitting device is operated by signals having a voltage selected from two voltages.

- 48. (New) A device according to claim 47, wherein said M is an element selected from the group consisting of nickel, cobalt and palladium.
- 49. (New) A device according to claim 47, wherein the semiconductor component is a TFT.
- 50. (New) An electrical appliance using the light emitting device according to claim 47.
- 51. (New) A portable telephone using the light emitting device according to claim 47.
- 52. (New) A digital camera using the light emitting device according to claim 47.
- 53. (New) An audio equipment using the light emitting device according to claim 47.
- 54. (New) A wireless portable equipment using the light emitting device according to claim 47.

55. (New) A light emitting device comprising:

a semiconductor component; and
an electroluminescent element electrically connected to the semiconductor component,
wherein the electroluminescent element includes a thin film including a luminescent material
expressed by a following formula:

wherein M represents an element belonging to group 8 to 10 of the periodic table, and wherein the light emitting device is operated by signals having a voltage selected from two voltages.

- 56. (New) A device according to claim 55, wherein said M is an element selected from the group consisting of nickel, cobalt and palladium.
- 57. (New) A device according to claim 55, wherein the semiconductor component is a TFT.
- 58. (New) An electrical appliance using the light emitting device according to claim 55.
- 59. (New) A portable telephone using the light emitting device according to claim 55.
- 60. (New) A digital camera using the light emitting device according to claim 55.

61. (New) An audio equipment using the light emitting device according to claim 55.

62. (New) A wireless portable equipment using the light emitting device according to claim 55.
